CRASH FACTS

& STATISTICS

Illinois Department
of Transportation

Welcome to the 2018 Illinois Crash Facts & Statistics.

At the Illinois Department of Transportation, protecting and enhancing the safety of travelers throughout the state is our No. 1 priority. As part of these efforts, we publish Illinois Crash Facts & Statistics each year.

This edition takes a deep dive into the behavior of Illinois drivers to help us understand when, where and why crashes occur. By gathering, studying and sharing this information, we hope to help drive down the number of fatalities to zero.

In 2018, the number of traffic-related deaths decreased by 5% over the prior year. While an improvement, the sad fact remains that we lost 1,035 people in 951 crashes. Although the number of fatal crashes was down, there was a 0.7% increase in the number of injuries. The sheer volume of these figures makes it clear that our work is far from done.

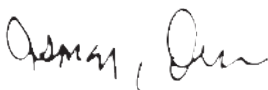

For years, IDOT has endeavored to boost traffic safety through statewide initiatives, such as Start Seeing Motorcycles, Drive Sober or Get Pulled Over, and Click It or Ticket. These programs are implemented statewide every year to remind motorists of simple choices that can make all the difference. Avoid distractions. Don't drive impaired. Buckle up. Slow down. Watch for bicyclists and pedestrians.

One of our most recent safety campaigns, Life or Death Illinois, is hitting close to home with motorists. The campaign's public service announcements promote safe driving behaviors by sharing video memories of Illinoisans who lost their lives to fatal accidents. The affecting films serve as a sobering reminder that one life lost is too many, and that the statistics in this report are not mere numbers. They represent family members, coworkers, neighbors and friends.

We are making advancements in other key areas. Our engineering and programming efforts are continually evolving to make our transportation system safer by incorporating proven methods and strategies out in the field. Most important, Gov. JB Pritzker's Rebuild Illinois was signed into law this past year. The largest capital program in state history and one that touches all modes will invest \$33.2 billion in transportation, modernizing our infrastructure and making it safer for everyone in urban, suburban and rural communities.

As always, when you travel throughout the state, please be mindful of your surroundings, fellow motorists and others sharing the road. By working together to make responsible choices, we can reach our goal of zero fatalities.

Sincerely,

Omer Osman, Acting Secretary

2018 Illinois Crash Facts and Statistics

The Illinois Department of Transportation's Office of Planning & Programming, Bureau of Data Collection, extends its appreciation to local, county and state law enforcement agencies for their assistance in investigating and reporting traffic crashes and to county coroners and the medical examiner of Cook County for providing pertinent information. Without their efforts and cooperation, this publication would not have been possible.

IMPORTANT NOTE

The law regarding the reporting threshold for property-damage-only crashes was amended, effective Jan.1, 2009, as follows:

When all drivers involved in a crash are insured, the amount of damage to any one person's property that must be reported increased from \$500 to \$1,500. If any driver does not have insurance, the threshold remains at \$500. The change did not affect the reporting of injury crashes or fatal crashes.

The noticeable decline in property-damage crashes may have been influenced by IDOT's safety efforts; however, part of the decline is attributable to this change in the crash reporting threshold.

There were 109,127 crashes reported in 2018 for which damage to any one person's property totaled between \$501 and \$1,500.

Any injury, other than a fatal or incapacitating injury, that is evident to observers at the scene of the crash. Includes lump on head, abrasions, bruises, minor lacerations.

C-INJURY (possible injury)

Any injury reported or claimed that is not either an "A," "B" or fatal injury. Includes momentary unconsciousness, claims of injuries not evident, limping, complaints of pain, nausea, hysteria.

Work Zone Crashes

A work zone is an area of a trafficway (right-of-way line to right-of-way line) where construction, maintenance or utility work activities are identified by warning signs, signals or indicators, including those on transport devices that mark the beginning and end of a construction, maintenance or utility work activity. It extends from the first warning sign, signal or flashing lights to the END ROAD WORK sign or the last traffic control device pertinent to that work activity. In Illinois, the first warning sign denoting the beginning of a work zone consists of an orange diamond sign displaying the message "ROAD CONSTRUCTION AHEAD" or "ROAD WORK AHEAD." Work zones also include roadway sections where there is ongoing, moving work activity, such as lane line painting or roadside mowing, only if the beginning of the ongoing, moving work activity is designated by warning signs or signals.

A work zone crash is a motor vehicle traffic crash in which the first harmful event occurs within the boundaries of a work zone or the approach to or exit from a work zone, resulting in activity, behavior or control related to the movement of the traffic units through the work zone.

Workers do not have to be present at the time of the crash for it to be considered a work zone crash.
